CLUTCHES AND CABLES

AMERICAN MADE
SINCE 1948

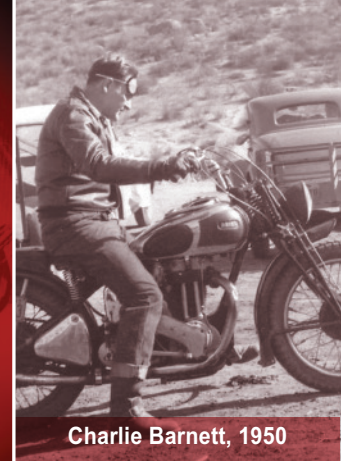

FOUNDERS CHARLIE AND AFTON BARNETT

Since Charlie Barnett started out with a small storefront in Huntington Park, California in 1948, Barnett has been producing clutches and control cables with direct-fit/upgrade applications for just about everything on two wheels. From vintage bikes to the newest machines on the showroom floor, street to off-road and even ATV's. All Barnett products are made in the USA with top-quality materials and designs. Multiple quality checks throughout the build process guarantee that the customer is getting a no-compromise upgrade. Barnett also specializes in custom cables. From custom length cables to specialized "one-off" cables, Barnett is the industry leader in custom cables made to order. Still family owned and operated today, Barnett is dedicated to continue to produce top quality motorcycle components with the best possible product and customer support. Install a Barnett clutch or cable and Feel the Barnett Difference!

THE BARNETT DIFFERENCE ★★★★★

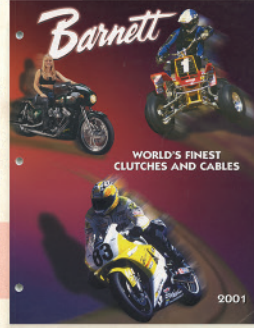

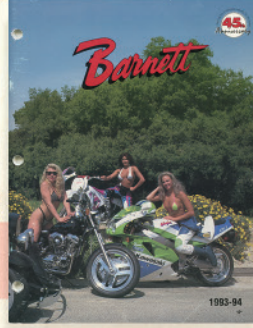

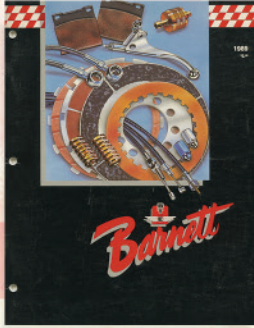

Barnett Tool & Engineering is proud to announce that 2018 will be our 70th year in business in the motorcycle industry! When Charlie and Afton Barnett started out in a small storefront in Huntington Park, Ca in 1948, they believed that in making performance motorcycle parts, they must be of the finest quality and that customer service and satisfaction must be second to none. Those beliefs run as deep today with the Barnett family as they did 70 years ago. Still family owned and operated, Barnett products are still made in America- by riders, for riders.

CABLE FINISHES AND OPTIONS

Our High Efficiency clutch cables feature a nylon coated inner wire and are pre-lubed with a super slick silicone lube for a reduced lever effort and ultra smooth performance.

- Clear-Coat™ is an extruded Teflon cover that will not discolor due to weather and sunlight.
- Elbows and hardware are polished and chrome plated where applicable.
- All fittings and hardware are made in-house.

HOW TO ORDER CUSTOM BARNETT CABLES

HOW TO ORDER CUSTOM BARNETT CABLES

Here at Barnett we specialize in making custom cables as well as stock replacement cables. While the majority of the cables we make are for Harley Davidson models, Metric Cruisers, and Vintage motorcycles, we can make a wide variety of cables for many different types of motorcycles and custom "one-off" applications.

We also have a variety of cable housings available which include traditional black vinyl, stainless steel braid with clear coat and our new Platinum Series which consists of a bright silver plated braiding with clear coat. In addition, we offer a "High Efficiency" inner wire for use on clutch cables. This inner wire is nylon coated and is lubed with a silicone lube to help reduce clutch lever effort.

HOW TO ORDER CUSTOM CABLES FOR HARLEY DAVIDSON AND METRIC CRUISER MODELS

The most common request we receive is for over or under stock length cables for various handlebar conversions. While we cannot tell you what length will work for each individual application, we can make the cables any length that you require. The simplest way to order custom length cables is to simply tell us how many inches over (+) or under (-) the stock length you need the cables to be and what type of casing you desire.

To order, please follow these steps:

1. Find the cable listing for your model in the Barnett catalog.

To order a specific casing type, simply change the first three numbers of the part number to one of the following:

- 101 = Traditional Black
- 102 = Stainless braid w/clear coat
- 106 = Platinum Series bright silver
- 131 = Stealth Series (Only available on 1987 & late HD models)

"HE" = Designates "High Efficiency" inner wire (for clutch cables only). To order a High Efficiency clutch cable, please specify this at the time of ordering. **All Barnett Metric Cruiser and Harley Davidson clutch cables come standard with the High Efficiency inner wire.**

2. In order to have the cable made in the over or under length you desire, simply add it to the end of the part number and/or specify the length at the time of ordering.

HOW TO ORDER FOR CUSTOM APPLICATIONS OR APPLICATIONS NOT LISTED IN CATALOG

If you are in need of a custom cable or a cable that we do not list in our catalog, you will need to do one of the following:

1. Send us your original cable(s), if possible. We will duplicate the cable per your instructions. If you need any measurements of the cable changed, specify clearly what you need done.
2. Send us a detailed drawing of what you require. Be sure to include all measurements and specifications. Please refer to the Custom Cable Measuring Guide in this catalog to see exactly how we measure our cables. Specify what type of casing that you desire. On Harley Davidson/Custom V-Twin applications, be sure to let us know what type of carburetor you are using and what type of hand controls (*if other than stock*).

CLUTCH COMPONENTS FOR HARLEY-DAVIDSON

HARLEY-DAVIDSON Sportster- Through 1970» REPLACEMENT CLUTCH KITS,
PLATES & SPRINGS

	DESCRIPTION	PART #
	'Extra-Plate' Clutch Kit - Consists of 8 friction plates, 1 steel driven plate and a set of heavy-duty clutch springs. Made of our new Kevlar type friction material giving a maximum performance while eliminating swell, fading and creeping problems. Installs like a stock clutch, nothing else needed. Adds approximately 14% more clutch surface area.	303-30-10010
	Friction Plate Kit - Consists of 7 friction plates bonded to aluminum cores. (H.D. No. 37985-52A0)	302-30-10010
	Sintered Friction Plate - These race-proven plates are for the serious racer and the ultimate answer for hot strokers. The plates are made of sintered-iron fused to high tensile strength cores. Resistant to wear and high temperatures. They are designed to be run dry, but if they become contaminated with oil, they can be easily cleaned and reused. Normally used as a slipper clutch. .140" Thickness.	301-30-70004
	Drive Plates - Replaces H.D. #37992-52. Made of steel, .047 thickness, key-hole slots.	401-30-047050
	Extra-Thick Drive Plates - Made of heavy gauge steel for use in racing machines (primarily drag bikes) in conjunction with our #301-30-70004 sintered-iron friction plates. Thicker plates help reduce warpage problems and also build up stack height as friction plates wear.	401-30-059050 (.059" thick) 401-30-089050 (.089" thick) 401-30-075050 (.078" thick) 401-30-119050 (.119" thick)
	Sportster Backing Plate - Fits models thru 1970. Made of heavy gauge steel. Replaces H.D. No. 38016-57.	401-30-089070
	Clutch Springs - Replacement (Set of 6), 40 lbs @ 1"	501-39-06052
	Clutch Springs - Heavy Duty (Set of 6), 50 lbs @ 1"	501-50-06053

	DESCRIPTION	PART #
	Clutch Kit - Friction Plate Kit - Finally, a single clutch kit for all applications, wet or dry. All Big Twins from 1941-E84. Consist of 5 friction plates made on a steel core, using our exclusive "molded" Carbon Fiber Friction Compound. It will handle all your clutch needs, whether you're running an open belt drive, sealed primary or conventional set-up. Resists "Glazing" which causes chatter/noisy engagement. Tolerates extreme heat, suitable for all High Performance applications. The porosity of the compounds adapts it perfectly to wet applications for a smooth, positive, no slip clutch action.	302-30-30005 (Wet/Dry)
	Extra-Plate Clutch Kit-Wet/Dry - Consists of six bonded friction plates, one steel plate and a set of heavy-duty clutch springs. On pre-1968 models, an extra steel drive plate is required (either stock or our No. 401-30-119006). This kit adds approximately 20% more clutch surface area.	304-30-10005
	Sintered Iron Friction Plate - For racing applications only. .160" Thick, 6 required per clutch pack.	301-30-70089
	Clutch Hub Liner/Backing Plate - Comes complete with necessary rivets for mounting to clutch hub.	301-30-50804
	Steel Drive Plates - Same as H. D. No. 37975-41. Sold individually. Models thru 1967 require three plates. 1968 and later models require four plates.	401-30-119006
	Clutch Springs - 1941-67, Replacement. 50 lbs @ 1-1/8" (Set of 10 - Orange)	501-66-10041

Remember who won the Daytona 200 in 1949? Barnett was there.

Twenty-five years ago, racing at Daytona Beach was exactly that. No high-bank superspeedway, just the beach. Riders screamed along the sand before turning left onto a section of old, abandoned highway, then blasted themselves and their machines through another left onto the sand. That was the Daytona 200 in 1949.

Motorcycling has changed since "The Good Old Days." Why? More motorcycles, more racing programs, more sales.

Barnett sets the pace in a red-hot market and has since 1948.

OFF-ROAD CLUTCH BASKETS

Our clutch baskets are CNC machined from tough billet aluminum and feature patented replaceable stainless steel inserts to prevent severe grooving of the basket where the clutch plate tabs make contact. Oil passage windows are also machined into the basket to increase oil flow to the clutch plates resulting in cooler operating temperatures and a longer clutch life. Grade 8 quality fasteners are included and the backing plate is also included where applicable.

TERMS AND CONDITIONS

IMPORTANT! PLEASE READ BEFORE ORDERING.

DEALERS: Barnett Tool & Engineering sells only to legitimate motorcycle industry businesses. A Barnett Dealer Application must be filled out and approved before orders can be placed. Possession of a Sales Tax Resale Number only does not automatically give any business or individual the privilege of buying from BARNETT. BARNETT TOOL & ENGINEERING reserves the right of refusal to accept orders.

PRICING POLICY: All prices on our price list are suggested retail prices and may vary due to shipping and handling charges. Prices are subject to change without prior notice.

MINIMUM BILLING: All orders under \$30.00 are subject to our minimum billing of \$30.00.

TERMS: All new accounts are shipped C.O.D. "cash only". These terms remain in effect for sixty days from date of first shipment. After that period, at dealer's request, we will check references for accepting customer's check. All returned checks are subject to bank charges.

RETURNS-SHORTAGES: No returns will be accepted without prior authorization. To obtain authorization, call or write our office. You must enclose a note with the following information: Your name, address, invoice copy and date the part was shipped to you, and a description of the complaint or problem. Returns must be sent prepaid. No C.O.D.'s will be accepted. We reserve the right to make a 20% handling and restocking charge on all items returned unless defective or shipped in error. No credit or refund will be given on obsolete or discontinued parts unless defective. Claims of shortages must be made within 10 days from date of delivery. Merchandise may not be returned after 90 days from shipment. Unsold or unused merchandise must be returned within 90 days of shipment and then only with proper authorization from our office. Note: Return authorization numbers are good only for 30 days.

***NOTE:** No returns on custom, made to order cables, except for defects in material or workmanship.

DEALERS NOTE: BUYING FROM BARNETT TOOL AND ENGINEERING OBLIGATES YOU TO HANDLE CUSTOMER RETURNS. RIDERS SHOULD NOT RETURN ITEMS DIRECTLY TO US. RETURNED ITEMS ARE SUBJECT TO OUR INSPECTION AND WILL BE HANDLED PROMPTLY. REFUSING TO HANDLE CUSTOMER RETURNS MAY RESULT IN NON-ACCEPTANCE OF YOUR FUTURE ORDERS.

SHIPPING: All shipments are F.O.B. our plant. Specify method of shipping. If no shipping instructions are included with order, shipments will be made by the most reasonable means at our discretion.

WARRANTY: Barnett products are guaranteed against defects in material and/or workmanship only. This warranty shall be limited to the repair or exchange of the product which may be proven defective under normal usage. Barnett will not warranty any product that has been abused, misused, improperly installed or modified. Dealers or distributors are not authorized to make dispositions binding upon Barnett. Barnett Tool & Engineering will not be responsible for any labor charges incurred in removing or replacing any product under warranty.

WARRANTY-RETURNS: When returning parts for warranty inspection, all parts that were purchased in unit, such as a complete clutch kit, must be returned. This also applies to cables and all other products. All parts must be completely returned. Returns that are incomplete will not be considered for warranty inspection.

CLAIMS: Title to merchandise passes to customer on delivery to common carrier. Delivery of merchandise in good condition is the responsibility of the carrier and claims should be made with the carrier immediately.
